**Shooting better is a choice, and
that choice is yours!**

Hello,

Thank you for your interest in my Shooting Instruction. During this 2-day clinic I will cover all three disciplines of shooting: Singles, Handicap, and Doubles. Each shooter will be taken as an individual, since you come with varying degrees of ability, and experience. I will begin with making sure that you have a good solid shooting foundation, one that will allow you to enjoy your shooting game as never before.

You will learn to develop strong physical and mental game plans. We then take those game plans to the trap line. There, you will continue to fine-tune those skills under my guidance.

You will shoot approximately 300 to 325 targets per class, depending on the experience level and desire of the class. The clinic will be held rain or shine! Learning the proper way to deal with mother nature and what she can throw at you, makes the difference when the competition quits or sits in the clubhouse.

Due to my desire to make sure that you have as much individual time as possible, each class is limited to only 7 students. This will enable me to work with you more closely, and allow me to focus in on your specific needs as a shooter.

If shooting better is your goal, let Harlan Campbell Jr.'s Shooting Instruction ... help you reach that goal.

Remember... "Shooting better is a choice, and that choice is yours."

*Respectfully,
Harlan Campbell Jr.*

Trapshooting My Way

Shooting Better scores is a choice, and that choice is yours. The old saying....“So what have you done lately?”... is never more true than in today’s competitive shooting. With the start of each new day at the trap range you are given a new chance to be a winner, a new chance to prove yourself and the opportunity to set yourself apart from the rest of the shooting world. I am here to help you succeed with that new choice, to teach you a new way of shooting, and a new way of thinking, that I feel is the key to breaking higher scores.

I believe four things are important to...“Shooting Better”

1. Determination
2. Commitment
3. Courage
4. Confidence

These four factors linked with new concentration skills & thought process you will learn, the sky is the limit as to how far you advance your shooting game. You must be determined and stubborn in the path you have chosen...your mind set has to be...“Failure is not an option”. You must have a commitment to...1) *Go that extra mile...2) Put forth the greatest effort possible on every target... 3) Demand that you give 110% on each and every target!!* It takes courage to step out of your comfort zone in your effort to “Shooting Better”. NEVER give up just because you had a bad day or a bad round...learn from it...and make the changes necessary to better yourself, “Most Of All”...have confidence in yourself and the skills you are taught.

I will build you a system that will not fail, it’s you that will fail the system!

During the next two days, I am going to work with you and your style of shooting. We will work to incorporate a new thought process about your shooting game both on & off the line. You will think like “Competitors”...not just shooters out there making empties.

Depending on your experience level, I will work with you on the fundamentals of stance, setup, hold points, focus areas, gun fit, point of impact, and your routine on the line. These are building blocks of a good solid shooting foundation.

I will instruct you on how to develop concentration skills, game plans, and thought process that will not only work for you, but keep your focus when the going gets tough on the line. Learning and trusting these skills takes time, to allow you to stay focused on the job at hand...**TO BREAK MORE TARGETS AND CONTROL YOUR SHOOTING GAME!**

I will discuss the pressures and fears of breaking good scores and how to deal with that pressure...discuss the right times to make changes to your gun and shooting style to keep improving your shooting game.

I do believe in hard work and repetition to “*Develop Muscle Memory*”... believe me...it will take just that...**HARD WORK**...to reach your objective. I will push you to do your best, and not get lazy. *There is...NO “Secret”... NO “Magic Fairy Dust”...only Hard work...Desire...and Opportunity!*

SHOOTER INFORMATION SHEET
